## Summary

In 2002, Lema'an Achai was started by a group of people living in Ramat Beit Shemesh who were dedicated to helping improve the lives of members within various Jewish communities. Lema'an Achai's purpose is to provide people with long-term stability. They help guide those out of poverty and into a world where they are able to maintain a balanced life for themselves and their families. Their unique approach, "Smart Chesed," facilitates growth, leading towards self-sufficiency. When financial support is coupled with education, supportive guidance, and training, this can lead to a stronger and more beneficial outcome. Lema'an Achai is there to help in a positive way, in a way that helps foster independence and advance everyday lives.
